An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title of the invention has been changed to: "System and method of wavefront sensing for determining a location of focal spot".

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a method of determining a location of a focal spot on a detector array comprising the steps of defining boundaries of an integration domain for a lenslet; performing a center of mass calculation with respect to pixels within the boundaries; and correcting for an asymmetry parameter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Neal 6,130,419 discloses a method for mounting a wavefront sensor having a spot positions computation.
